SUMMARY

Junior Backend Developer skilled in TypeScript, Node.js, and Express, with practical experience building REST APIs, handling authentication, background job processing, and caching through hands-on personal projects. Comfortable working with MongoDB, Redis, and asynchronous queues, with a strong focus on writing secure, well-tested, and maintainable code. Eager to bring strong problem-solving skills and a continuous learning mindset to a professional backend engineering team.

EDUCATION

**Commercial Technical Secondary School at Commercial
Technical Secondary School, Menoufia , Egypt**

October 2023 - April 2026

SKILLS

Backend: Node.js , TypeScript , Express.js , JWT , Bullmq , Mongoose

Tests: Jest(Unit Testing , Integration Testing)

DevOps & Tools: Docker , Docker Compose , Git , Github , Ci

Database: Mongodb, Mysql , Redis

PROJECTS

Droply • [Github](#)

June 2026 - August 2026

RESTful API for a YouTube-like video-sharing platform built with Express, TypeScript, MongoDB, Redis, and BullMQ.

- Designed secure REST APIs with JWT-based authentication (access + refresh tokens)
- Implemented background job processing with BullMQ for video uploads and broadcast notifications
- Built signed URL system with Cloudinary for authenticated, expiring video access
- Added rate limiting across endpoints and wrote unit/integration tests with Jest

LANGUAGES

English - Conversational
